

### DISTRIBUTOR OF BOTTLES AND OTHER PRODUCTS

- The machines have a vending machine outside of bottles and products equipped with coin and key system.

### TRANS MANUAL PALLET

- The Lazzaroni Brothers offers a simple and handy for moving the tanks that contain milk: a manual trans pallet hydraulic circuit, with some guides that have been adapted to the shape of the tank. This system makes it easy and safe loading and unloading the truck up inside the machine.

### TRANSFER PUMP

- Effective and easy to use, allows you to fill the tank safely and quickly. It can also be used for washing tanks in your company.

### SOFTWARE

- The remote control is an intelligent solution that allows the breeder to know via SMS in real time all the eventualities of the system, such as power interruption, return it, attempted violation of the coin, quantity and milk supply, temperature milk, possible failures, etc.. This management is bidirectional, because the breeder can communicate via SMS with your dealer. The temperature record of product distributed on pen drives allows the transmission of data to the computer. The receipt shows the purchase of the data, date and quantity purchased.

- The specifications are subject to change due to product improvements
- The company reserves the right to change information at any time.

All components are CE certified

## FRESH milk vending machines Model for internal and external

*The modern dairy ...  
 ... the tradition back at hand!*

FRESH MILK VENDING MACHINES

INDIGIT - CALVISANO (BS)

# The modern dairy ... ... the tradition back at hand!

Fresh milk, an opportunity for farmers and a boon to the final consumer.

**DISTRIBUTORS LAZZARONI** designed with an excellent level of quality and cutting edge technology, allow to ensure the most demanding customer and the end consumer a high degree of satisfaction.

Based on its experience the company has built a **Lazzaroni F.lli** distributor of fresh milk with a high degree of safety, reliability, efficiency, durability, longevity, technology, ease of use and respect the needs and environmental sanitation.

Distributors Lazzaroni are made in accordance with all applicable European Union, including EC Directive 2004/22 metrology.

With the installation of a gas Lazzaroni his business will be more profitable, its products will arrive to the final consumer without intermediaries, 24 hours a day, 365 days a year.

Lazzaroni models, thanks to their high design and allow their variety of public places to be located in adapting to any environment.

We have four models: **Basic, Wood, Steel, Iron-Wood.**

## OUTDOOR MODEL:

**Steel - Wood - Iron-Wood**

The external structure is made of tubular steel, waterproof roof and side walls of wood or steel depending on model.

Distributors are equipped as standard with the following elements:

- 1 Or 2 cell lights with twilight.
- Electric panel according to the European.
- Board for alerts.
- Port-Brochure available to customers.
- Dispenser napkins.
- Tray-and hook for the object.

## MODEL FOR INTERNAL:

**basic**

The internal model has the same technology as the distributor from outside, except wood or steel casing. The ideal solution for supermarkets and small shops.

## CELL COOLING

The Lazzaroni distributors are equipped with a refrigeration system, which ensures maximum control of the temperature of the milk. The refrigerator consists of a metal panel 7 cm thick with an airtight door.

- The interior light makes it easy to replace the tank.
- The flow certificate that provides a reliable measurement of the amount of milk and legally administered.
- The thermal insulation of the insulated tank, ensure the cold chain from the place of production to the point of sale.

## NICHE OF MILK SUPPLY

Made of stainless steel and high volume, admits vessels of up to 5 liters.

It is equipped with electronic door lock, which opens only after the inclusion of credit, and closing. Cleaning is simple, as it completed the delivery of milk, when you close the door, the distributor makes a programmable automatic washing, which removes any remaining milk.

## INSULATED TANK

Made from high quality stainless steel, with a capacity variable, 200, 300 and 400 liter insulated to keep milk at low temperature.

They are equipped with:

- Manhole for loading milk,
- For waste gate valve,
- Water connection complete with drilled ball for washing,
- Control of the temperature probe,
- Automatic stirrer for the handling of milk,
- Pump for delivering milk,
- Four wheels for moving.

## COIN

- Payment system with metal coins and banknotes.
- Key reader.
- Sheet high security stainless steel with an extra thick that protects the electronics box and the coin.
- Electronic-display basic information for the consumer.
- Printer-ticket (tickets).
